International Society for Distributed Computing

Office of Awards

March 14, 2025

Dear Dr. Raman,

On behalf of the Awards Committee, I am pleased to inform you that you have been selected as the 2025 recipient of the Lindqvist Prize for Systems Research. The Prize recognizes a single researcher or practitioner whose work has had exceptional impact on the design of large-scale computing systems.

This year the Committee considered 214 nominations from 31 countries. The Committee, composed of nine past recipients and fellows of the Society, selected your work on bounded-staleness replication for "fundamentally changing how the industry builds geo-replicated storage."

The Prize carries an honorarium of $25,000 and will be presented at the Society's annual congress in Lisbon.

Sincerely,

Prof. Annelise Brandt, Chair, Lindqvist Prize Committee

About the Lindqvist Prize

Established in 1998, the Lindqvist Prize is awarded once a year and is regarded as one of the two most prestigious honors in distributed systems. Past recipients include the designers of several widely deployed consensus protocols.

Coverage of the 2025 Prize appeared in Systems Engineering Quarterly and The Meridian Technology Review.

Selection criteria: originality, demonstrated adoption outside the nominee's own organization, and influence on subsequent research.
